

EDI 850 Purchase Order Implementation Guide

1. Introduction

The EDI 850 Purchase Order is an ANSI X12 transaction used by buyers to electronically communicate purchase order information to suppliers. This sample implementation guide defines example requirements for Partner A.

Transaction Type	850
Business Document	Purchase Order
Partner	Partner A

2. Transaction Structure

Segment	Description
ISA	Interchange Control Header
GS	Functional Group Header
ST	Transaction Set Header
BEG	Beginning Segment for Purchase Order
REF	Reference Information
N1	Name Information
PO1	Purchase Order Line Item
CTT	Transaction Totals
SE	Transaction Set Trailer
GE	Functional Group Trailer
IEA	Interchange Control Trailer

3. BEG Segment Requirements

The BEG segment contains the beginning information for the purchase order.

Example: BEG*00*SA*P0123456**20261003~

Element	Description	Required	Example / Format
BEG01	Purpose Code	Yes	00
BEG02	Purchase Order Type Code	Yes	SA
BEG03	Purchase Order Number	Yes	P0123456
BEG05	Purchase Order Date	Yes	CCYYMMDD / 20261003

Validation Rules

BEG03 must contain a valid purchase order number. If BEG03 is missing, Partner A will reject the EDI 850 transaction.

BEG05 must contain the purchase order date in CCYYMMDD format.

4. REF Segment

The REF segment provides additional reference information.

Example: REF*DP*123~

Element	Description	Required
REF01	Reference Identification Qualifier	Yes
REF02	Reference Identification	Conditional

5. PO1 Segment

The PO1 segment contains purchase order line-item information.

Example: P01*1*10*EA*25.50**VP*ITEM1001~

Element	Description	Required
PO101	Assigned Identification	Yes
PO102	Quantity Ordered	Yes
PO103	Unit of Measure	Yes
PO104	Unit Price	Yes
PO107	Product/Service ID	Yes

6. Validation and Error Handling

Partner A validates incoming EDI 850 transactions before processing. Common validation errors are listed below.

Code	Issue	Cause	Resolution
E101	Missing Purchase Order Number	BEG03 is missing	Populate BEG03 with a valid purchase order number
E102	Invalid Purchase Order Date	BEG05 is not CCYYMMDD	Correct BEG05 using the required date format
E103	Missing Partner Identifier	ISA06 or ISA08 is missing/invalid	Verify sender and receiver identifiers
E104	Invalid Transaction Type	ST01 does not contain 850	Verify ST01 contains the correct transaction set identifier

7. Troubleshooting Guide

Problem: EDI 850 transaction rejected because the purchase order number is missing.

Check: BEG03

Expected: A valid purchase order number.

Example: BEG*00*SA*P0123456**20261003~

Resolution: Populate BEG03 and retransmit the transaction.

Problem: EDI 850 rejected because of invalid date.

Check: BEG05

Expected Format: CCYYMMDD

Correct Example: 20261003

Incorrect Example: 03/10/2026

Resolution: Convert the purchase order date to CCYYMMDD format before transmitting the transaction.

Note: This is a synthetic sample document created for testing the Enterprise Document Intelligence Copilot. It is not an official trading-partner implementation guide.
